## NEBOSH (National Examination Board for Occupational Safety & Health)

Health and Safety appointed representatives are faced with a constant battle against ever changing Health and Safety legislation and the impact on their respective organisations. In addition EC regulations stipulate that Health and Safety representatives must be competent to perform the role. The NEBOSH Construction Certificate course upon completion is recognised as providing most of this competence, along with providing delegates with the skills to interpret and implement current Health and safety requirements.

### Who's the course for?

Construction Certificate is a qualification both for those with construction management responsibilities and for those who are required to provide routine, day-to-day advice on health, safety and welfare in construction work.

### Course Aims and Benefits

NEBOSH aims to improve delegates' ability to identify hazards and recommend appropriate action by:

- Developing the ability to investigate accidents and make cost effective recommendations
- Developing a practical understanding of safety legislation
- Developing an appreciation of human and organisational problems and possible solutions

### Course Content

- Provisions under the Health and Safety At Work etc. Act 1974
- Safe systems of work
- Guarding of Machinery
- Role and powers of enforcing authorities
- Fire Legislation
